

The MARC/AL Interface Utility™ is a utility which allows Auto Librarian™ SE Library Server and V.4 users to read the USMARC/MicroLIF records included with the purchase of books from major book vendors such as Baker & Taylor, Brodart, Follett and others, thus eliminating the need to input manually, newly purchased books. This utility also enables users who have a union disk or MARC records from Bibliofile or Internet searched MARC records using MARC LOC and MARCEXplorer to upload their books into Auto Librarian™ SE Library Server and V.4 without keying in the information. This is an import feature only. The utility does not export Auto Librarian book records in MARC format.

FEATURES

EASY TO USE THREE STEP MAIN MENU

When using the MARC/AL Interface Utility the MARC records are not altered in any way. They are read and then converted into Auto Librarian™ book records. The MARC record remains intact for later use.

The MARC/AL Interface Utility has a graphical interface which makes it easy to use to import MARC records from any source including book vendors, downloaded records in MARC format using the MARC LOC and MARCEXplorer utilities saved to disk, union disks, or other MARC record collections.

The user basically fills in the following into input screens:

Drive, subdirectory and name of incoming file.

Whether or not to generate book numbers on the fly.

The user enters: 1) Starting booknumber, or MARC field source and subfield source for booknumber, if supplied by book vendor, 2) MARC field source and subfield(s) for call number, and 3) MARC field source and subfield source for Price.

To receive the MARC records into Auto Librarian the user simply begins with STEP 1 at the MAIN MENU and completes the Conversion Input Form (above). Step 2 allows the user to view the converted MARC records and edit them and Step 3 sends the converted MARC records to Auto Librarian. Duplicate booknumbers are rejected. The MARC record information is brought into the new larger book database fields as well as Publisher, Illustrator, Pages and Cost fields. An onscreen Help window provides context sensitive help as each input is completed by the user. The MARC/AL Interface Utility is that easy to use and makes quick work of book data entry!

MARC/AL INTERFACE UTILITY FACT SHEET PAGE 2

SYSTEM REQUIREMENTS

The **MARC/AL INTERFACE UTILITY** works in conjunction with **Auto Librarian™ SE Library Server** and **Auto Librarian Library Server V.4**

SYSTEM: Microsoft Windows 8 (32-bit or 64-bit) or Windows 7 (32-bit or 64-bit)

MORE REASONS TO CHOOSE The MARC/AL INTERFACE UTILITY:

- **Free Technical Support via email or non-toll free number.**
- **Affordable:** See price sheet for current pricing. The **MARC/AL Interface Utility** is an inexpensive alternative to costly MARC record library management software. This utility allows users of the inexpensive **AUTO LIBRARIAN** family of library management software to avail themselves of the convenience of MARC records without the usual high costs of using them. The **MARC/AL Interface Utility** is priced well within even the tightest library budget. This cost includes the lifetime use of the utility. There are no hidden costs or annual service agreements.
- **MARC LOC** and **MARCEXPLORER** companion products search and retrieve MARC records on the Internet—see our website for more information. **Receive a free 1 month trial of MARCEXPLORER when purchasing MARC/AL Interface Utility.**

*If you don't have access to MARC records for your collection - NO PROBLEM! Use the **MARC Record Locator Service** for only **\$34.99/year**. This online service is built-in to the **Auto Librarian Library Server SE**. Just enter an ISBN# and download the book information directly into the Auto Librarian book record fields from the Library of Congress online database of 14 million+ records. Click Add Books and Search MARC button to request a pin# today!*
