

Auto Librarian™ Remote Card Catalog SE Version is software for a networked searching station to be used in conjunction with Auto Librarian™ SE Library Server Version. Auto Librarian™ SE Remote Card Catalog Version utilizes a remote computer as a separate card catalog for libraries seeking to allow patrons to use a remote computer as a "hands on" remote card catalog. Results of searches on book database can be viewed on screen and/or printed. Patrons can access their own borrower record and place checked out books on reserve from the remote station. Designed to be networked through Windows networks.

FEATURES

EASY TO USE

Graphical windows interface is very user-friendly for even the youngest patrons. Computer skills are not required for its use. Users can preset computer to control use of printer (on or off) to save paper (or if a printer is not available).

Auto Librarian™ SE Remote Card Catalog allows the librarian to utilize the main computer for circulation uninterrupted by patron requests for book information.

QUICK SEARCHING OF BOOK DATABASE

Grid and Form View

Current Book Database is "live" from main Auto Librarian™ SE Library Server computer. The Book database is displayed in grid format on the screen with Navigator buttons for easy database maneuvering. Form View button displays the form view of the highlighted book record. Form View records contain all of the information about a book including: Booknum, Title, Author, Callnum, Publisher, 4 Subject Headings, ISBN, LCCN, Copyright, Pages, Illustrator and Unlimited Summary fields as well as an Amazon.com button adding another dimension to book searches. Click this button for access to book reviews, excerpts, cover illustration, more titles by the author, and much more online. ISBN number and Internet access required for this option. Book status: Checked In, Checked Out (with Due Date) or Missing is also displayed.

The Book database can be searched in two ways:

1) **Enter Search Information:** Key in search information on screen after choosing sort criteria: by Booknum, Title, Author, Call number, or Subject. Books are listed in grid format. Use navigator buttons (prior record and next record) to refine search. Entire book record can be viewed by highlighting book record and clicking on Form View button.

2) **Key Word searches:** key word searches can be made on the following fields: A) Title, B) Title and Author, or C) All fields: Title, Author, Subject, Publisher and Summary fields. An, A, The, articles are ignored in key word searches. Searches can be narrowed or widened using AND, OR, NOT search criteria. Results of search are listed in grid format and entire book record can be viewed by highlighting book record and clicking on Form View button. See book fields listed above. Results of key word searches can be viewed on screen and/or printed. Key word search report includes Title, Callnum, Author and Booknum.

Remote Card Catalog SE Fact Sheet Page 2

BORROWER RECORD VIEW

Borrowers can review their borrower records by clicking on a User Record Review button. A valid borronum and phone number are needed to access record. Fines, Borrower History, Check Outs and Reserves can be reviewed.

RESERVE CAPABILITY

Books found to be checked out upon searching the book database can be reserved by the borrower with a valid borronum and phone number.

Note: Borrower Record View and Borrower Reserve Capability can be disabled by the librarian.
